ANNUAL SUMMARY OF MARKET STATISTICS

For more than 95 years, USDA's Agriculture Marketing Service has provided current, unbiased price and sales information to assist in the orderly marketing and distribution of Agricultural commodities. Reports include information on prices, volume, quality, condition, and other market data on Agricultural products in specific markets and marketing areas.

The *Poultry Market Statistics Summary* contain information on prices, volume, quality, condition and other relevant information pertaining to the marketing of these commodities. It also includes commodity specific information at local, regional, national, and international levels. This information is compiled by the Livestock, Poultry and Grain Market News Division, of the USDA Agricultural Marketing Service - Livestock, Poultry and Seed Program. This information is used by customers industry wide to promote the efficient and orderly marketing of these particular commodities. More detailed historical market information and statistics for all of the reported commodities are available upon request from the Livestock, Poultry and Grain Market News office in Des Moines, Iowa. Furthermore, for current market reports and publications, visit our web site at www.ams.usda.gov/LPSMarketNewsPage.

Index

Definition of Terms

An average price is computed by dividing the sum of the midpoints of price ranges reported during the period by the number of price ranges during the period.

A weighted average price is computed by dividing the total value of the sales during the period by the total number of units sold during the period.

A yearly average price is the mean of the 12 monthly averages, unless otherwise noted.
A monthly average price is not computed when a price is not reported for 5 or more consecutive trading days. A yearly average price may not be computed when an average price is not reported for 1 or more months.

Where appropriate, a yearly price may be computed when the volumes associated with all reported prices can be determined; in which case, a yearly weighted average may be reported.

Matched plant comparisons are made by comparing information from the same sources reporting in each of two different periods, e.g., current and previous week or current and previous year.
